Markon drives enterprise digital transformation by **modernizing architecture**, **accelerating secure software delivery**, and **integrating data**, **cloud**, **and automation capabilities** to improve mission performance across complex federal environments.

CORE CAPABILITIES

DEVSECOPS AND ZERO TRUST ARCHITECTURE

We advance IT governance and portfolio management to help agencies improve oversight, ensure accountability, and align technology investments with mission and enterprise priorities.

- DevSecOps Implementation & Automation
- Secure IT Infrastructure Development
- Application Security
- Enterprise Systems Engineering & Technical Support

AGILE LIFECYCLE AND TECHNOLOGY MANAGEMENT

Markon develops and sustains applications, administers Linux and enterprise environments, delivers responsive service desk support, and engineers robust network, cloud, and systems solutions that keep missions running seamlessly.

- Agile Project & Portfolio Management
- Enterprise IT Service Management
- Mission-to-business-case Translation
- Non-traditional Acquisition & Rapid Prototyping Support
- Full Lifecycle Acquisition Support

CONTINUOUS MODERNIZATION, AI, AND AUTOMATION

We partner with federal clients to innovate and securely integrate emerging technologies—such as AI/ML, cloud, and automation—into complex enterprise environments, accelerating mission modernization and performance.

- AI Governance & Ethical AI Adoption
- Automation Toolkits (RPA, ML Models)
- Predictive Analytics & Scenario Planning
- Decision Analytics & Visualization
- Innovation Management

CLOUD TRANSFORMATION

We design and deliver IT training and adoption strategies that empower digital workforces, enhance technology performance, and sustain the efficiency, security, and reliability of mission-critical systems.

- Cloud Strategy, Migration, & Management
- Cloud & Emerging Tech Integration
- Linux & Infrastructure Administration
- Data Quality & Risk Management

PROPRIETARY PRODUCTS

TECTIX

Accelerates Risk Management Framework (RMF) workflows and ATO readiness through RMF automation, system integration, predictive analysis, automated compliance checks, and detailed reporting.

WINGMAN

Enhances mission workflows through AI-enabled collaboration, intelligent assistance, interactive terminal support, and secure integration with modular AI capabilities.
