

CAPABILITIES

Critical Infrastructure

Markon's versatile critical infrastructure consulting practice supports diverse valued problem sets, including physical security, procurement planning, compliance, and the development, enhancement, and management of secure facilities.

Overview

ACQUISITION EXPERTISE

Markon provides comprehensive support in acquisition planning, procurement operations, contract management, and compliance, delivering strategic planning, innovative procurement strategies, and expert contract administration. Our services include advisory and decision support for procurement and logistics personnel, ensuring effective solutions across all phases of the acquisition lifecycle, from market research to contract administration.

FACILITIES EXPERTISE

We bring a dedication to excellence to projects of all sizes, whether it's renovating small spaces, or constructing secure government campuses. We guide clients through every stage of facilities projects, offering risk mitigation advice, industry best practices, and essential tools for success. With a multidisciplinary staff and a reputation for reliability and effectiveness, Markon is frequently chosen as the owner's representative for prestigious clients, always focused on ensuring project success.

SECURITY EXPERTISE

In the ever-evolving realm of security risks, constant evaluation of facilities, policies, and procedures is essential. Our experts partner with you to develop tailored solutions that address current and future challenges, utilizing comprehensive protection strategies and a risk management model. With a track record of addressing security concerns for top-tier clients and complex campuses, our security professionals ensure thorough coverage and trusted advisory services.
