

# DIGITAL TRANSFORMATION

## Markon

Markon drives enterprise digital transformation by modernizing architecture, accelerating secure software delivery, and integrating data, cloud, and automation capabilities to improve mission performance across complex federal environments.

## Core Capabilities

### DevSecOps and Zero Trust Architecture

We advance IT governance and portfolio management to help agencies improve oversight, ensure accountability, and align technology investments with mission and enterprise priorities.

- DevSecOps Implementation and Automation
- Application Security
- Secure IT Infrastructure Development
- Enterprise Systems Engineering and Technical Support

### Agile and Lifecycle Technology Management

We develop and sustain applications, administer Linux and enterprise environments, deliver responsive service desk support, and engineer robust network, cloud, and systems solutions that keep missions running seamlessly.

- Agile Project and Portfolio Management
- Enterprise IT Service Management
- Security Risk Assessment Framework (SRAF)
- Non-traditional Acquisition and Rapid Prototyping Support
- Mission-to-Business Case Translation
- Full Lifecycle Acquisition Support
- Protective Design and SCIF Coordination

### Continuous Modernization, AI, and Automation

We partner with federal clients to innovate and securely integrate emerging technologies—such as AI/ML, cloud, and automation—into complex enterprise environments, accelerating mission modernization and performance.

- AI Governance and Ethical AI Adoption
- Automation Toolkits (RPA, ML Models)
- Predictive Analytics and Scenario Planning
- Decision Analytics and Visualization
- Innovation Management
- AI-driven Workflow Optimization

### Cloud Transformation

We provide actionable threat intelligence and targeting analysis that anticipates adversary behavior, informs defensive posture, and supports operational decision-making.

- Cloud Strategy, Migration, and Management
- Cloud and Emerging Tech Integration
- Linux and Infrastructure Administration
- Data Quality and Risk Management

## Product Solutions

Explore our suite of mission technology product solutions, engineered to streamline operations, enhance decision advantage, and optimize performance.

### TECTIX™

**AUTOMATED. INTEGRATED. PREDICTIVE.**

Accelerates Risk Management Framework (RMF) workflows and ATO readiness through RMF automation, system integration, predictive analysis, automated compliance checks, and detailed reporting. Learn more: [markonsolutions.com/tectix](https://markonsolutions.com/tectix)

### WINGMAN™

**AI-ENABLED COPILOT.**

Enhances mission workflows through AI-driven collaboration, intelligent assistance, interactive CNO terminal framework, and secure integration with modular AI capabilities.
